

NABARD POPI

Maharashtra Co-operative Development Corporation has been promoted to set up 05 farmers producing companies in 05 districts on 02 January 2019 under POPI Phase 01 under the Producer Organization Promoting Institutions (POPI) scheme under NABARD. The aim is to set up a total of 25 farmers producing companies on 12th July 2019 under the POPI Phase 02.

Farmers' productive societies may be an association, organization, co-operative society, association or even a firm established for the purpose of promoting farmer's interest. The main purpose of the Farmers Manufacturers Company is to provide supportive services to the farmers or farmers to assist them in their production or post harvesting activities, while connecting small and small weed growers to the market.

Farmers' productive societies or groups work to enable small and smallholder farmers to participate successfully in local, national and global supply chains.

Under this project, a cluster selection of farmers producing companies, baseline surveys, capacity building, study board of the board of directors, awareness programs, board of directors, training of executive officers of the farmers producing company, obtaining government licenses, making business proposals. There is a lot of work to do.

Popi Phase 01: - 05 All Farmer Producer Companies in the Farmer Manufacturers Establishment have been established. According to the deliverables set by NABARD, the work has been completed in six months and the claim amount has been received by the corporation.

Popi Phase 02: - 10 farmers producing companies have been set up in 25 farmers producers' establishments. And the rest of the company registration work is in progress. According to the deliverables set by NABARD, the work of 16 districts has been completed in the first quarter, and the work of the rest of the district is on track.

Outline for the future: - Proposals will be submitted for the Poppy Phase 03 through NABARD, under which the corporation can get the job of creating an estimated 50 farmers producing companies in the future.
